

Product Spotlight: Inovonics Pendants

September 16, 2021

“As senior living increasingly focuses on resident independence, the industry needs innovative ways to manage resident wander and infection risks, improve response time to emergencies, and ensure protection while maintaining resident freedoms. IoT-based technologies provide effective, connected, and fully redundant systems that senior care communities can trust and utilize to combat these concerns and give residents a safe and efficient environment.”

– Chad Ries, IoT for All

Super Nurse Call (SNC) Wireless Call Systems are Powered by Inovonics, the leading wireless technology manufacturer in the senior living industry. The best-selling Inovonics line of wireless pendants and network infrastructure has helped emergency call system providers deliver effective and innovative solutions for senior living communities for over 30 years.

Inovonics' single-button Pendant transmitter, P/N EN1221S-60, is waterproof and can be worn in the shower. An LED alert and vibration provides the resident confidence that their call was sent out for help. Reset Pendant with a magnetic card or button press pattern. Low battery, signal loss problems and regular check-ins are automatically transmitted to ensure the system is always working. The EN1221S-60 works with all Super Nurse Call systems.

With Inovonics wireless networks as the backbone of Super Nurse Call notification systems, you can be assured you are getting the best and most popular technology in the market. Super Nurse Call is dedicated to providing caregivers the best technology to help them be super at their jobs. Trusted Technology for Super Caregivers. That is why we are partners with Inovonics.
